

What is claimed is:

1. A home network system comprising:
a home server controlling home appliances;
a first wireless communication means connected to the home server; and
a second wireless communication means connected to the home appliances,
communicating with the first wireless communication means.
2. The home network system as claimed in claim 1, wherein the home server is connected with the first wireless communication means by cable.
3. The home network system as claimed in claim 2, wherein the cable is RS-232C cable.
4. The home network system as claimed in claim 1, wherein the home appliances are connected with the second wireless communication means by cable.
5. The home network system as claimed in claim 4, wherein the cable is RS-232C cable.
6. The home network system as claimed in claim 1, wherein the first and second wireless communication means are RF (Radio Frequency) communication modules.
7. The home network system as claimed in claim 1, wherein the home server displays a select screen showing functions of the home appliances.

8. The home network system as claimed in claim 1, wherein the home server provides the select screen showing functions of the home appliances to an external terminal.

9. The home network system as claimed in claim 1, wherein the home server stores a record regarding operations of the home appliances.

10. The home network system as claimed in claim 9, wherein the record regarding operations of the home appliances includes a driving time and mode of the home appliance, and power consumption.

11. The home network system as claimed in claim 1, wherein the home server has a reservation function of operating the home appliance at a preset time.

12. The home network system as claimed in claim 1, wherein the first and second wireless communication means have frequency band between 300MHz and 2.9GHz.

13. The home network system as claimed in claim 1, wherein the home server controls a channel of the first wireless communication means.

14. The home network system as claimed in claim 1, wherein the first wireless communication means is mounted inside the home server.

15. The home network system as claimed in claim 1, wherein the second wireless communication means is mounted inside the home appliance.

16. The home network system as claimed in claim 1, wherein the second wireless communication means respectively connected to the home appliances have different channels.
